

**Introducing Dolby's New 3D plastic reusable glasses, available now!**

The Dolby 3D Plastic Reusable Glasses (CAT 830) offer a new, lightweight design while still delivering the same premium 3D viewing experience customers have come to expect from Dolby 3D. The Dolby 3D Plastic Reusable Glasses list for \$17.00USD.

**NEW Dolby 3D Plastic Reusable Glasses (CAT830)**

**Order information below**

**Dolby 3D Glass Reusable Glasses (CAT834)**

The original Dolby 3D reusable glasses model has proven to be durable, long-lived and trusted by customers and audiences worldwide. As with the new model, glass reusables are better for the environment than disposable glasses offered by other 3D solutions. The Dolby 3D Glass Reusable Glasses list for \$17.00USD.

**Dolby 3D Glass Reusable Glasses (CAT834)  
Order information below**

**Ordering Process:**

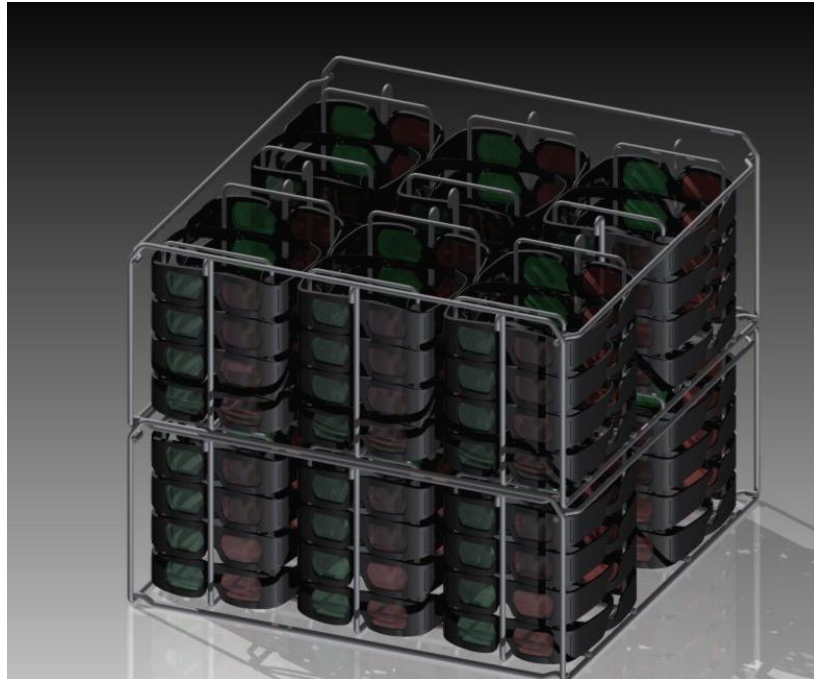

In order to expedite your order:

- **Specify “Dolby 3D glasses” on the Purchase order (P.O.) but not a specific model number or glasses type.** In that way, we will be able to fulfill each order based on available inventory which could be either of the two versions of our 3D glasses.
  - If a customer does require a specific model number, they can specify this information on their P.O. However, order shipment times may be negatively impacted if their specified model of glasses are not readily available.
  
- **The Plastic Reusable glasses will not be available for shipment within the United States or Canada at this time.** We anticipate worldwide availability in the near future and will fill orders accordingly.

### **Dolby 3D Washing/Storage trays- New and Improved:**

Concurrent with the development of our new Plastic Reusable Glasses, Dolby incorporated 3D customer feedback to re-engineer the washing/storage tray solution, resulting in a new design that significantly improves functionality, handling, & logistics at a similar cost:

- Universal design can be used with either model of Dolby 3D glasses and is **strongly** recommended for use with the Plastic Reusable Glasses (CAT830).
- Holds up to 60 CAT 830 or 42 CAT834 vs. the 16 pair maximum for CAT834s previous racks held.
- Reduces the number of trays needed per Dolby 3D deploy from 30 to 9 trays.
- New & improved tray is similarly priced to the original tray.
- Reduces the storage area needed between movies.
- Easier to load and unload the glasses
- Improves theatre logistics of moving glasses around.
- Helps reduce spotting by keeping the lenses vertical.
- Allows the theatre staff to shake the tray to shed any remaining excess water after washing, without dislodging the glasses.
- Reduces energy, chemicals, water, and employee time for washing.

The new trays (design patent pending) can be ordered by contacting Marlin Steel Wire Products directly:
