

Faces of Trade®

Marlin Steel Wire

Marlin Steel Wire is a leading manufacturer of custom wire baskets, forms, and assemblies. The company caters to clients from the pharmaceutical, medical, industrial, aerospace, and automotive industries all over the world. With a full-time team of engineers and industry leading technology, Marlin Steel Wire is able to produce a world class product entirely in the United States. What is unique about Marlin Steel Wire is their ability to provide a highly customized product to their clients with little production time. This has allowed Marlin Steel Wire to stand out in its industry and receive orders from nations such as Australia, New Zealand, Ireland, Singapore, Brazil, Hungary, Poland, Israel, Canada, Mexico and Taiwan. As global demand for Marlin Steel Wire's products has increased so too has the effect of global sales on the work force. One-fourth of Marlin Steel Wire's employees are employed as a direct result of the company's export business. President Drew Greenblatt understands the importance of foreign trade and describes the impact it can have on small business, **"We want to ship to more countries, grow our client base and create more jobs. Free Trade Agreements have helped us accomplish this in the past, and can help our business grow in the future. We look forward to selling more to South Korea, Colombia, and Panama when the Senate ratifies the already-signed trade agreements"**
